

IC 75-2580
5 November 1975

MEMORANDUM FOR: General Wilson

THROUGH: [REDACTED]

SUBJECT: Training of CONTEXT Operators

1. CONTEXT plans call for training operators for the system at a time just before the CONTEXT IOC date now estimated to be early next year. We wish to delay the training as long as possible because the computer program software (being done at NSA) is constantly evolving and we wish to train on the most up-to-date programs possible in order to avoid retraining.

2. An additional kind of training is available from the contractor [REDACTED] but this would be for familiarization with the equipment in order to take full advantage of the future potential of the equipment. The contractor training is not critical to our training program to meet the IOC date.

3. The CONTEXT can be demonstrated to the USIB using the on-the-job training already acquired by [REDACTED]. The critical item controlling the USIB demonstration is the large screen monitor which is scheduled to be ready by 15 November.
